WORK EXPERIENCE

Senior Software Engineer

07/2024 – Present

CitiusTech Healthcare Technology Private Limited

Airoli

- Architected a reusable UI component library using **Lit and TypeScript**, delivering core interface elements used across multiple regulated clinical applications.
- Standardized a rigorous **Definition of Done (DoD)** incorporating WCAG accessibility, i18n (LTR/RTL), and design tokens to ensure high-fidelity delivery.
- Ensured software auditability and security compliance by managing end-to-end versioning and consistent unit testing with **Vitest**.
- Boosted application performance and SEO by engineering automated image optimization pipelines with **Sharp and Jimp**, resulting in measurably improved Lighthouse scores.
- Spearheaded the development of technical accelerators, including **Agentic SQL Parsers** and Patient 360 dashboards, to validate feasibility and increase presales velocity.
- Designed a specialized medical imaging chat POC featuring drag-and-drop validation, clinical study sidebars, and contextual history.
